

SIDER switches 125 to 1600 A

Functions

SIDER switches are manually operated tri- or tetrapolar switches.

They changeover between two low voltage power circuits on load and provide safety isolation.

Compliance with standards

- IEC 60947-3
- NF EN 60947-3
- VDE 0660 Teil 107 (1992)
- NBN EN 60947-3
- BS EN 60947-3

Accreditation and approvals⁽¹⁾

- Bureau Veritas

(1) In progress for certain ratings.

General characteristics

- 3 stable positions (I, O, II) and possible switching from one to the other on load (AC-22 and AC-23)
- Fully visible isolation
- Visible double breaking.

Manufactured or available on request

- Switches on 3-6 pole.
