## Switchboard Instruments

## Power line multi-meter WE1MA

## Description

Perform measurement and monitoring for 213 points in 52 categories for 3-phase/3-wire, and 3-phase/4-wire

## ■ Features

- With one unit, you can measure or monitor the voltage, current, demand current, power, demand power, reactive power, apparent power, power factor, frequency, harmonic effective value ( $\mathrm{A}, \mathrm{V}$ ), distortion, harmonic content rate, active energy and reactive energy.
- The unit supports 3-phase/3-wire and 3-phase/4-wire.
- The measurements are displayed using a four-element display: one display on the main monitor and three displays on the sub-monitors along with a bar graph.
- Outputs include four analog circuits, a pulse output, an alarm output and a communications output (according to specification).

## WE1MA

- Communications output supports F-MPC Net, Modbus RTU, and RS-485 (according to user specification).
- All models comply with the RoHS Directive (i.e., lead-free).

## Types and ratings

| Measurement | Input specifications |  | Type |
| :---: | :---: | :---: | :---: |
|  | Input circuits | Input range |  |
| ```Current (max. demand, demand, instantaneous), power (max. demand, demand, instantaneous), voltage, power factor, frequency, reactive power, active energy, reactive energy, harmonic effective value, distortion, and harmonic content rate``` | Single-phase/2-wire, Single-phase/3-wire, 3-phase/3-wire or all common | 150V/300V, 5A | WE1MA-EFF11- $\square 11$ |
| Current (max. demand, demand, instantaneous), power (max. demand, demand, instantaneous), voltage, power factor, frequency, reactive power, apparent power, active energy, reactive energy, harmonic effective value, distortion, and harmonic content rate | 3-phase/4-wire | 440/ $\sqrt{3} \mathrm{~V}, 5 \mathrm{~A}$ | WE1MA-E4B11- $\square 11$ |

The maximum value (maximum demand current. others), minimum value can be checked by pressing max/min button.

## Type number nomenclature

|  | Harmonic measurement |  | Average time limit: $0 \mathrm{~min}, 1 \mathrm{~min}, 2 \mathrm{~min}, 5 \mathrm{~min}, 10 \mathrm{~min}, 15 \mathrm{~min}, 30 \mathrm{~min}$ (average measurement) |  |  |  |  |  |  |
| Bar graph error | $\pm 10 \%$ (\% of span) |  |  |  |  |  |  |  |  |
| Temperature effect | $23 \pm 10^{\circ} \mathrm{C}$ permissible differential |  |  |  |  |  |  |  |  |
| Conforming standards | JIS C 1102-1, -2, -3, -4, -5, -7(1997), JIS C 1111(1989), JIS C 1216(1995), JIS C 1263(1995), EIA standard RS-485 (1983) |  |  |  |  |  |  |  |  |
| Display refresh time | Approx. 1s (approx. 0.25 s for a bar graph) (For the digital display and the bar graph and 10s for the digital display and the bar graph for harmonic measurement.) |  |  |  |  |  |  |  |  |
| Display elements and composition | Liquid crystal display |  | Main monitor |  |  | Character height: 11 mm , 5 digits |  |  |  |
|  |  |  | Sub-monitor on left |  |  | Character height: $6 \mathrm{~mm}, 4$ digits |  |  |  |
|  |  |  | Sub-monitor in center and on right |  |  | Character height: $6 \mathrm{~mm}, 5$ digits |  |  |  |
|  |  |  | Bar graph |  |  | 20 dots |  |  |  |
| LCD viewing angle | Upper mounting (viewed from below): top: $10^{\circ}$, bottom: $60^{\circ}$, left/right: $60^{\circ}$ |  |  |  |  |  |  |  |  |
| Backlight | LED backlight: White, always ON, automatically turns OFF (after 5 min with no operation), can be set to always OFF. |  |  |  |  |  |  |  |  |
| Auxiliary supply | 85 to 265 V AC, $50 / 60 \mathrm{~Hz}$ 10VA (Rated voltage AC100/110V, 200/220V) 80 to 143 V DC, 6W (Rated voltage DC100/110V) for both AC and DC uses |  |  |  |  |  |  |  |  |
| Rush current (Time constant) | Rated voltage 110V AC 2.2A or less (About 3.6ms) |  |  |  |  |  |  |  |  |
|  | Rated voltage 220V AC 4.4A or less (About 3.6ms) |  |  |  |  |  |  |  |  |
|  | Rated voltage 110V DC 1.6A or less (About 3.6ms) |  |  |  |  |  |  |  |  |
| Input power consumption (VA) | Voltage circuit |  | 0.2VA max. |  |  |  |  |  |  |
|  | Current circuit |  | 0.1VA max. (5A) |  |  |  |  |  |  |
| Overload resistance | Voltage circuit |  | $2 \times$ rated voltage for 10 s, $1.2 \times$ rated current for continuous |  |  |  |  |  |  |
|  | Current circuit |  | $40 \times$ rated voltage for $1 \mathrm{~s}, 20 \times$ rated current for $4 \mathrm{~s}, 10 \times$ for 16 s , $1.2 \times$ rated current for continuous |  |  |  |  |  |  |
|  | Power supply power |  | 1.5 x rated voltage for $10 \mathrm{~s}, 1.2 \mathrm{x}$ rated current for continuous, 1.5 x rated voltage for 10 s at 110 V DC, 1.3 x rated voltage for continuous at 110 V DC |  |  |  |  |  |  |
| Insulation resistance JIS C 1102-1 JIS C 1111 | Between electrical circuits and external cabinet (ground) |  |  |  |  | $50 \mathrm{M} \Omega \mathrm{min}$. with 500 V DC tester |  |  |  |
|  | Between inputs, outputs, and auxiliary power supply |  |  |  |  |  |  |  |  |
|  | Between outputs (analog, communication, pulse, or alarm) |  |  |  |  |  |  |  |  |
|  | Between pulse outputs |  |  |  |  |  |  |  |  |
|  | Between alarm outputs |  |  |  |  |  |  |  |  |
|  | Analog outputs (negative common) are not isolated. |  |  |  |  |  |  |  |  |
| Withstand voltage JIS C 1102-1 JIS C 1111 | Between electrical circuits and external cabinet (ground) |  |  |  |  | 2000V AC (50/60Hz), 1min. |  |  |  |
|  | Between inputs, outputs, and auxiliary power supply |  |  |  |  |  |  |  |  |
|  | Between outputs (analog, communication, pulse, or alarm) |  |  |  |  | 1500 V AC ( $50 / 60 \mathrm{~Hz}$ ), 1min. |  |  |  |
|  | Between pulse outputs |  |  |  |  |  |  |  |  |
|  | Between alarm outputs |  |  |  |  |  |  |  |  |
|  | Analog outputs (negative common) are not isolated. |  |  |  |  |  |  |  |  |
| Impulse withstand voltage JIS C 1111 | Between electrical circuits (except analog outputs and communications outputs) and cabinet (ground) |  |  |  |  | $6 \mathrm{kV}, 1.2 / 50 \mu \mathrm{~s}$, positive and negative polarity, three times each |  |  |  |
|  | Between analog outputs or communications outputs and cabinet (ground) |  |  |  |  | $5 \mathrm{kV}, 1.2 / 50 \mu \mathrm{~s}$, positive and negative polarity, three times each |  |  |  |

|  | Alarm elements | Item | Specification |  |  |  |  |
|  | Demand current | Function | Alarm display and alarm output when demand measurement value $\geq$ upper-limit set value |  |  |  |  |
|  |  | Setting accuracy | $\pm 1.0 \%$ (\% of full scale) |  |  |  |  |
|  |  | Setting range | $5 \%$ to $100 \%$ of max. scale value ( $1 \%$ steps) |  |  |  |  |
|  | Demand power | Setting accuracy | $\pm 1.0 \%$ (\% of full scale) |  |  |  |  |
|  |  | Setting range | $5 \%$ to $100 \%$ of max. scale value ( $1 \%$ steps) |  |  |  |  |
|  | 5th harmonic conversion content rate | Function | Alarm display and alarm output (detection at maximum phase) when measurement value $\geq$ Upper-limit set value |  |  |  |  |
|  |  | Setting accuracy | Current: $\pm 2.5 \%$, Voltage: $\pm 1.0 \%$, as percentage of content rate |  |  |  |  |
|  |  | Setting range | Current 5 5th harmonic conversion content rate, nth harmonic content rate ( $\mathrm{n}=3,4,5,7,9,11,13$, or 15), distortion $5 \%$ to $100 \%$ ( $1 \%$ steps) |  |  |  |  |
|  | nth harmonic content rate |  | Voltage 5 5th harmonic conversion content rate, nth harmonic content rate ( $n=3,4,5,7,9,11,13$, or 15 ), distortion $5 \%$ to $20 \%$ ( $0.1 \%$ step |  |  |  |  |
|  | Distortion | Detection characteristics | Average value mode: Detection when the average measurement value exceeds the setting given above <br> Inverse time limit mode: Detection according to inverse time limit characteristics of instantaneous value (only for 5th harmonic conversion content rate) |  |  |  |  |
|  | Voltage | Function | Alarm display and alarm output (detection for maximum phase) when measurement value $\geq$ upper-limit set value Alarm display and alarm output (detection for minimum phase) when measurement value $\geq$ lower-limit set value |  |  |  |  |
|  |  | Setting accuracy | $\pm 1.0 \%$ (with full scale as 150\%) |  |  |  |  |
|  |  | Setting range | $30 \%$ to $150 \%$ (1\% steps) with full scale as 150\% |  |  |  |  |
| External operation input |  | No. of inputs | 2 circuits and functions (4 types) switchable using settings |  |  |  |  |
|  |  | External reset | The alarm output or maximum/minimum value can be reset by adding an external voltage signal. Alarm output reset and maximum/minimum value reset can be switched using settings. The input has the same ratings as the auxiliary power supply. |  |  |  |  |
|  |  | External display switching | The display can be switched by adding an external voltage signal. Measurement element switching and phase switching can be set. The input has the same ratings as the auxiliary power supply. |  |  |  |  |
|  |  | Minimum operation pulse width: 300 ms continuous application supported <br> (1) $100 / 110 \mathrm{~V}$ AC $0.4 \mathrm{VA}, 200 / 220 \mathrm{~V}$ AC $1.4 \mathrm{VA}, 100 / 110 \mathrm{~V}$ DC 0.4 W , Accepts both AC and DC . <br> Contact capacity: Approx. 3mA (100/110V AC/DC), approx. 6mA (200/220V AC) <br> (2) 24 V DC $0.3 \mathrm{~W}, 48 \mathrm{~V}$ DC 1.2 W , Contact capacity: Approx. 10 mA ( 24 V DC ), approx. 20 mA ( 48 V DC) |  |  |  |  |  |
| Vibration and shock resistance JIS C 1102-1 JIS C 0040, 0041 |  | Vibration: 0.15 mm single amplitude, 10 to 55 Hz , 1 octave per minute for 5 sweeps Shock: $490 \mathrm{~m} / \mathrm{s} 2$, three times each in $X, Y$, and $Z$ directions |  |  |  |  |  |
| Operating temperature and humidity range |  | -10 to $55^{\circ} \mathrm{C}, 30 \%$ to $85 \%$ RH (no condensation) |  |  |  |  |  |
| Operating temperature and humidity range |  | -25 to $70^{\circ} \mathrm{C}$ |  |  |  |  |  |

[^0]- Communications specifications

| Communications specification | Item | Specification |  |  |
| :---: | :---: | :---: | :---: | :---: |
| F-MPC Net | Standard | EIA RS-485 (1983) | Cable length | 1000m (total length) |
|  | Transmission method | 2-wire half-duplex | Address | 1 to 99 and not used (Loc) |
|  | Synchronization method | Asynchronous | No. of connectable units | Up to 31 units per system (including other devices) |
|  | Bit rate | 4800/9600/19200bps |  |  |
| Modbus RTU communications output | Standard | EIA RS-485 (1983) | Cable length | 1000m (total length) |
|  | Synchronization method | Asynchronous | Address | 1 to 247 (31 units max. can be connected) |
|  | Bit rate | 4800/9600/19200/38400bps |  |  |

## $\square$ Measurement range

- Voltage measurement range (34 ranges)

| 150.0 V | (110V) | $1500 \mathrm{~V}$ | (1100V) | $18.00 \mathrm{kV}$ | (13.2kV) | $180.0 \mathrm{kV}$ | (132kV) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 150 V | (110V) | 2400 V | (1650V) | 18.00 kV | (13.8kV) | 210.0kV | (154kV) |
| 300.0 V | (220V) | 3000 V | (2200V) | 24.00 kV | (16.5kV) | 270.0 kV | (187kV) |
| 300 V | (220V) | 3.00 kV | (2200V) | 25.00 kV | (18.4kV) | 300.0 kV | (220kV) |
| 500 V | (380V) | 4500 V | (3300V) | 30.0 kV | (22kV) | 400.0 kV | (275kV) |
| 600 V | (440V) | 4.50 kV | (3300V) | 45.0 kV | (33kV) | 500.0 kV | (380kV) |
| 600 V | (460V) | 9000 V | (6600V) | 90.0 kV | (66kV) | 750.0 kV | (550kV) |
| 600 V | (480V) | 9.00 kV | (6600V) | 120.0 kV | (77kV) |  |  |
| 1200 V | (880V) | 15.00 kV | (11kV) | 150.0 kV | (110kV) |  |  |

- Current display sensitivity: Sets the full scale of the current meter.

The sensitivity can be set to between $40 \%$ and $120 \%$ of the CT ratio.

- Power (apparent power range)

480W to 1000 MW range selection, maximum scale setting 40 to $115 \%$

- Reactive power

LEAD, LAG360var to 1000Mvar range selection, maximum scale setting $30 \%$ to $115 \%$

- Current measurement range (76 ranges)

- Power factor

LEAD0. 5 to 1 to LAG0.5 or LEAD0 to 1 to LAG0 range selection

- Frequency

45 to 55 Hz or 55 to $65 \mathrm{~Hz}, 45$ to 65 Hz range selection

Note:
When choosing input range<F>,Default setting of voltage measurement range is 6600/110V.
When choosing input range $<\mathrm{B}>$, Default setting of voltage measurement range is $600 / 440 / \sqrt{3} \mathrm{~V}$.

## Dimensions and mounting precautions

## - Dimensions, mm

## - Mounting precautions

(1) The contrast of the LCD display depends on the angle at which it is viewed. Mount the display at the proper angle and position.
Upper mounting

(2) Use a mounting panel with a thickness of 10 mm max. and mount the unit to the panel using the enclosed M5 nuts.
(3) Use a tightening torque of 2.75 to $3.82 \mathrm{~N} \cdot \mathrm{~m}$.

## - Part names and functions

## ■ Wiring diagrams

-3-phase, 3-wire *3 (2VT, 2CT)

- Single-phase/2-wire and single-phase/3-wire can also be applicable. Refer to the users manual for details

## - Communications output terminal arrangement

(1) F-MPC Net
(2) RS-485, Modbus RTU

- 3-phase, 4-wire ${ }^{* 3}$ (440V/ $\left.\sqrt{3 V} \times 3,3 C T\right)$

Note:

- Refer to the users manual for voltage 2 input.
- Contact output combinations

|  | Contact output <br> combinations |
| :--- | :--- |
|  | Pulse + alarm |
| Contact output 1 | Pulse output |
| Contact output 2 | Alarm output |

## Notes:

${ }^{* 1}$ Functionality for external operation input can be switched between external reset and external display switching by using settings.
${ }^{* 2}$ For contact outputs, you can select from the following: pulse outputs, alarm outputs. (by user specification)
${ }^{* 3}$ Secondary grounding for VT and CT is not required if a low-voltage circuit is used. Also, VT is not required if 110 V or 220 V direct input is used

- Please contact us for further information.

## Power monitoring system of Fuji Electric FA

- It can do package monitoring from high voltage to low voltage.
- We have the most suitable components to make up a full scale power monitoring system.
- Electric Energy can be package monitored by PC

## Protection Relay F-MPC60B

- This is multifunction relay which brings functions of protection, measuring, monitoring, transmission.
- It can protect many protection factors by itself. (detail below)
- Even when internal fault occur, it will prevent a miss-trip by

The internal CPU, duplication of analog circuit, AND output treatment.

- It always monitor internal movement by itself.
- It can be coordinated with higher network system by RS485,MODBUS, Analog output 4-20mA.

## List of functions \& products

| Unit |  |  |  |  | Protection |  |  |  |  |  |  |  |  |  |  |  |  |  |  | Measurement |  |  |  | Communication |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number of operational phase wires | Name | Grounding | Zerophase current detection | Basic product type | 9 |  |  | $\begin{aligned} & \mathfrak{g} \\ & 0 \\ & 0 \end{aligned}$ |  |  | $\begin{aligned} & \text { o } \\ & + \\ & \stackrel{+}{8} \\ & \hline- \end{aligned}$ | $\begin{aligned} & N \\ & \underset{c}{c} \\ & \vdots \\ & \dot{c} \\ & \stackrel{\rightharpoonup}{c} \end{aligned}$ | $\begin{aligned} & \mathfrak{O} \\ & 0 \\ & 0 \end{aligned}$ |  |  |  |  |  |  |  | $\begin{aligned} & \stackrel{\grave{j}}{\top} \end{aligned}$ |  | $\begin{aligned} & < \\ & 0 \\ & < \\ & 0 \\ & \frac{3}{x} \\ & \text { win } \end{aligned}$ |  |
| 3-phase/ 3-wire | Power receiving | Resistance grounding A, direct grounding | Residual circuit | UM43FG | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |  |  | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |  | $\bigcirc$ |  | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |  | $\bigcirc$ |
|  |  | Resistance grounding B |  | UM43FD | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |  |  | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |  | $\bigcirc$ | $\bigcirc$ |  | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |  |
| 3-phase/ 3-wire | Power receiving | Non-grounding | ZCT method | UM42F | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |  |  | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |  | $\bigcirc$ | $\bigcirc$ |  | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |  |
| 3-phase/ 3-wire (Single-phase/ 2-wire) | Feeder |  |  | UM42C | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |  |  | $\bigcirc$ |  |  |  | $\bigcirc$ | $\bigcirc$ |  | $\bigcirc$ | $\bigcirc$ |  | $\bigcirc$ | $\bigcirc$ |  |  |  |
| 3-phase/ 3-wire | Bus cable |  |  | UM4B |  |  |  |  |  |  | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |  |  |  |  |  | $\bigcirc$ |  |  | $\bigcirc$ | $\bigcirc$ |  |

Note 1: A rough guideline of classification in the above list is the resistance grounding A shall be a low resistance: approximately 200 A or more; and the resistance grounding B shall be a high resistance: 5 to 100 A or so.
Note 2: The 3-phase 3 cable power receiving unit UM43F $\square$ can be applicable to feeders. [Related document] User's manual FEH850

## Multiple circuit meter F-MPC04

- This is multifunction meter which has function which is needed for management of power distribution and monitoring electric energy.
- It can measure max 10 circuits by 3 phase 3 lines. ( 6 circuits by 3 phase 4 lines)
- 3rd 5th 7th , It can measure total harmonic current.
- It can output 2 stages of earth leakage protective relay/ leakage current pre-alarm and deterioration diagnosis by Using the trend data.
- Digital input is possible. (up to 4 points of digital signal)

## Monitoring software F-MPC NET

- ON/OFF information, the data of temperature and flow measured by F-MPC and super multi meter, can be visually shown on the screen of PC.
- It can analyze many things by its collected data. Also, Trend data of voltage and current can be Stored automatically.
- 30 minutes demand monitoring up to 10 points are possible.
- It can display the signal history such as alarm history and inform person in charge by e-mail.

## \. Safety Considerations

- Operate (keep) in the environment specified in the operating instructions and manual. High temperature, high humidity, condensation, dust corrosive gases, oil, organic solvents, excessive vibration or shock might cause electric shock, fire, erratic operation or failure.
- For safe operation, before using the product read the instruction manual or user manual that comes with the product carefully or consult the Fuji sales representative from which you purchased the product.
- Products introduced in this catalog have not been designed or manufactured for such applications in a system or equipment that will affect human bodies or lives.
- Customers, who want to use the products introduced in this catalog for special systems or devices such as for atomic-energy control, aerospace use, medical use, passenger vehicle, and traffic control, are requested to consult with Fuji Electric FA.
- Customers are requested to prepare safety measures when they apply the products introduced in this catalog to such systems or facilities that will affect human lives or cause severe damage to property if the products become faulty.
- For safe operation, wiring should be conducted only by qualified engineers who have sufficient technical knowledge about electrical work or wiring.
- Follow the regulations of industrial wastes when the product is to be discarded.
- For further questions, please contact your Fuji sales representative or Fuji Electric FA.

## Fuji Electric FA Components \& Systems Co., Ltd.

5-7, Nihonbashi Odemma-cho, Chuo-ku, Tokyo, 103-0011, Japan

[^0]:    $*^{3}$ The multiplying factor is 0.01 , but 0.1 is displayed for the multiplying factor.
    ${ }_{4}$ (Four digits are displayed for the integer portion, and four digits are displayed below the decimal point for the expanded display.)
    $\star^{4}$ A combination of two of the following outputs can be used: pulse output and alarm output.
